So:</p> </div> <p>Direct Connect ++ Setup</p> <ol style="list-style-type: none"> 1. Run Your DC++ client, 2. Go into "Settings" section (File -> Settings), than go into "Connection setting" node and enter the values as shown under,

3. Go to the Downloads node and enter address of Your SOCKS5 sever into "HTTP Proxy (only for hublist)" otherwise DC++ won't download hublist (although specyfyng hub address by CTRL+Q will work),

4. Restart Your DC++ client and use it as normal, share Your data and download goodies as shown....

DC++ 0.674 - [Public Hubs]
