

This is the guide to configure Download Accelerator Plus to use with HTTP Tunnel.

It is useful if your proxy/firewall blocks downloading certain types of file e.g. downloading .avi or .exe files

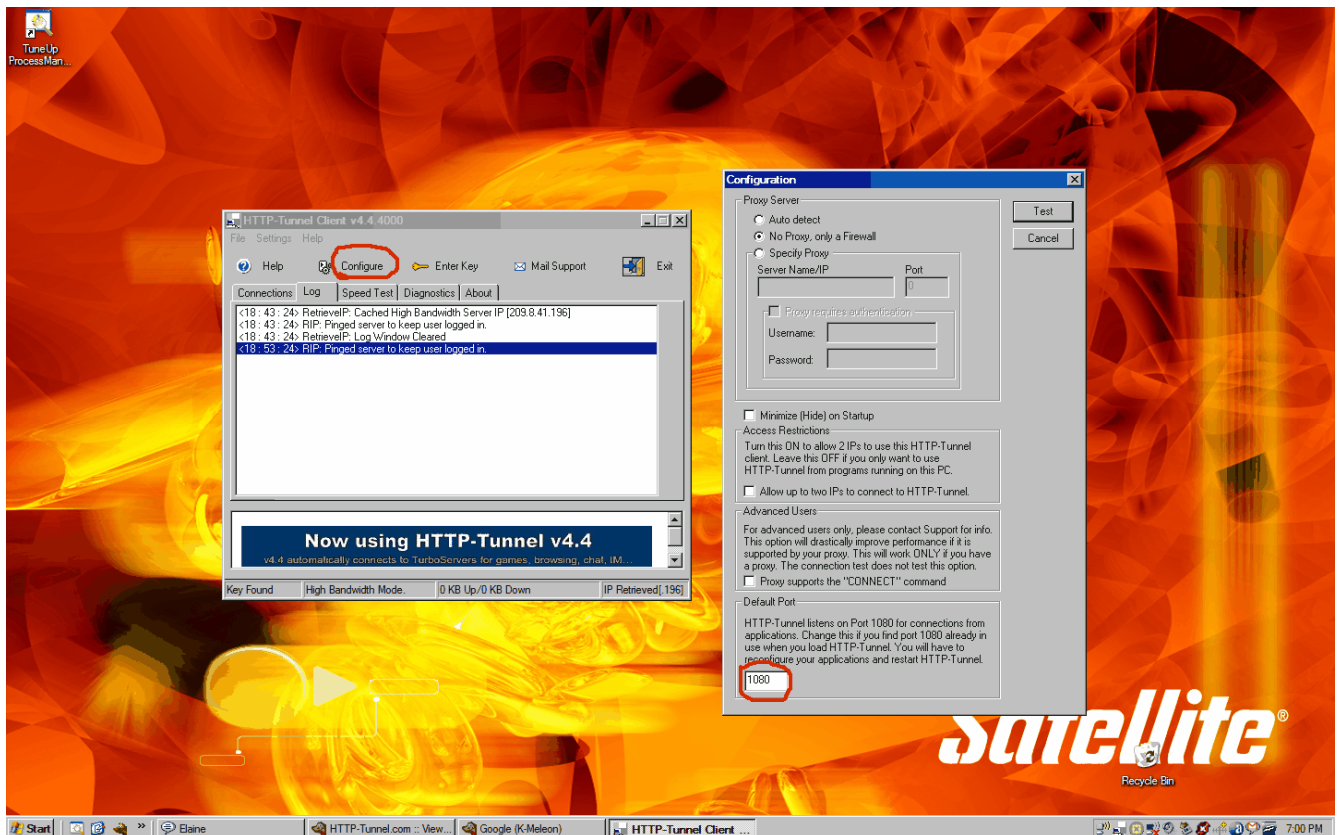

Also it is better than using your Web Browser to download since the DAP supports multiple streams in downloading,giving you better speeds

Please note that its only a configuration guide,we do not provide any support related to this specific client.

Once you have Http-Tunnel installed, run the application, The main window will appear, choose the configure option. There you will be presented with three (3) options.

1. You can Select Auto detect if you want Http-Tunnel to detect your settings.
2. No Proxy, only a firewall if this is appropriate.
3. Specify Proxy, Here you will enter the IP address and Port number of the proxy that you use.

Complete 1 of the 3 options, then click test, the client will bind to port 1080 and localhost by default and connect to the tunnel servers if your settings are correct.

Open Download Accelerator Plus (DAP)

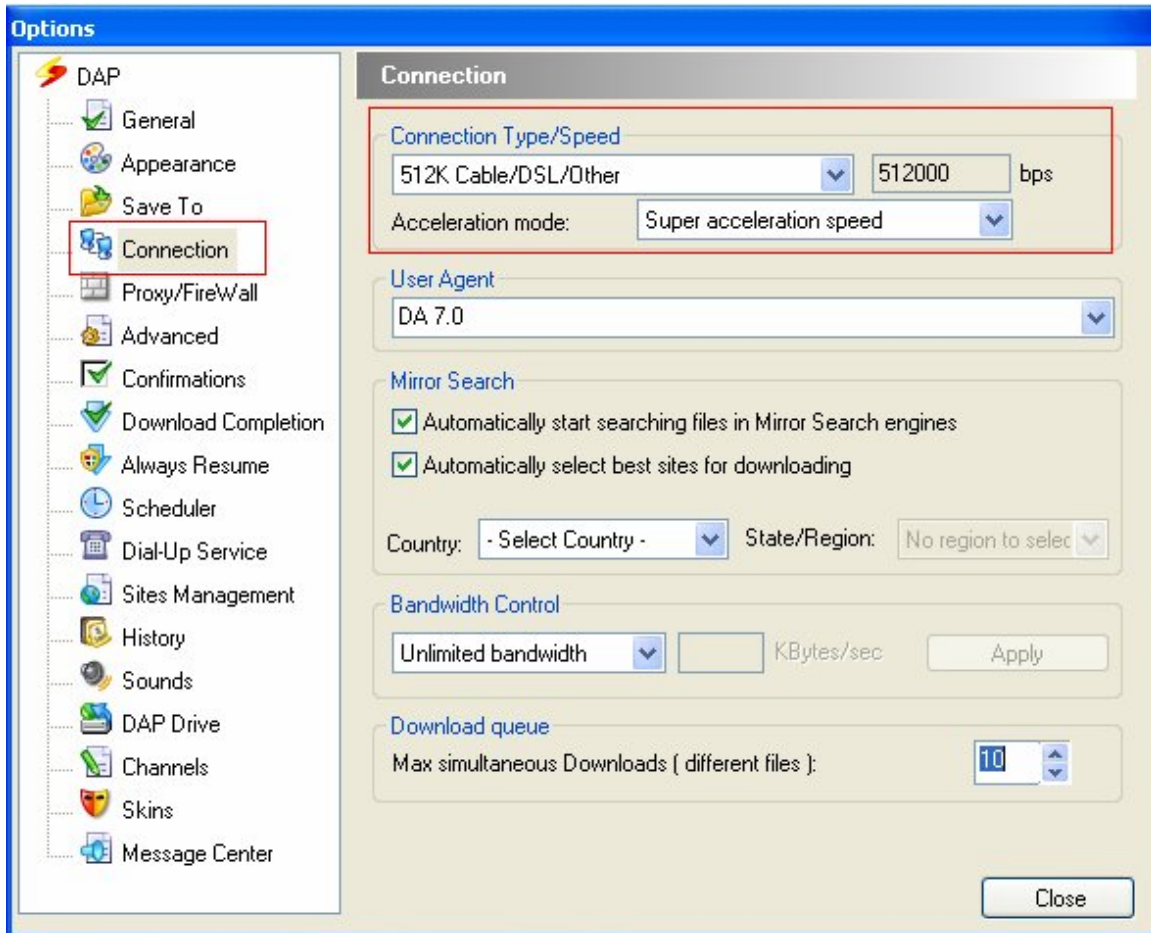

Click on Tools and go to Options.

1.From the left hand side choose Connections

In Connection Type/Speed choose 512 Cable/DSL/Other

In Acceleration Mode choose Super Acceleration Speed if you are a free user or

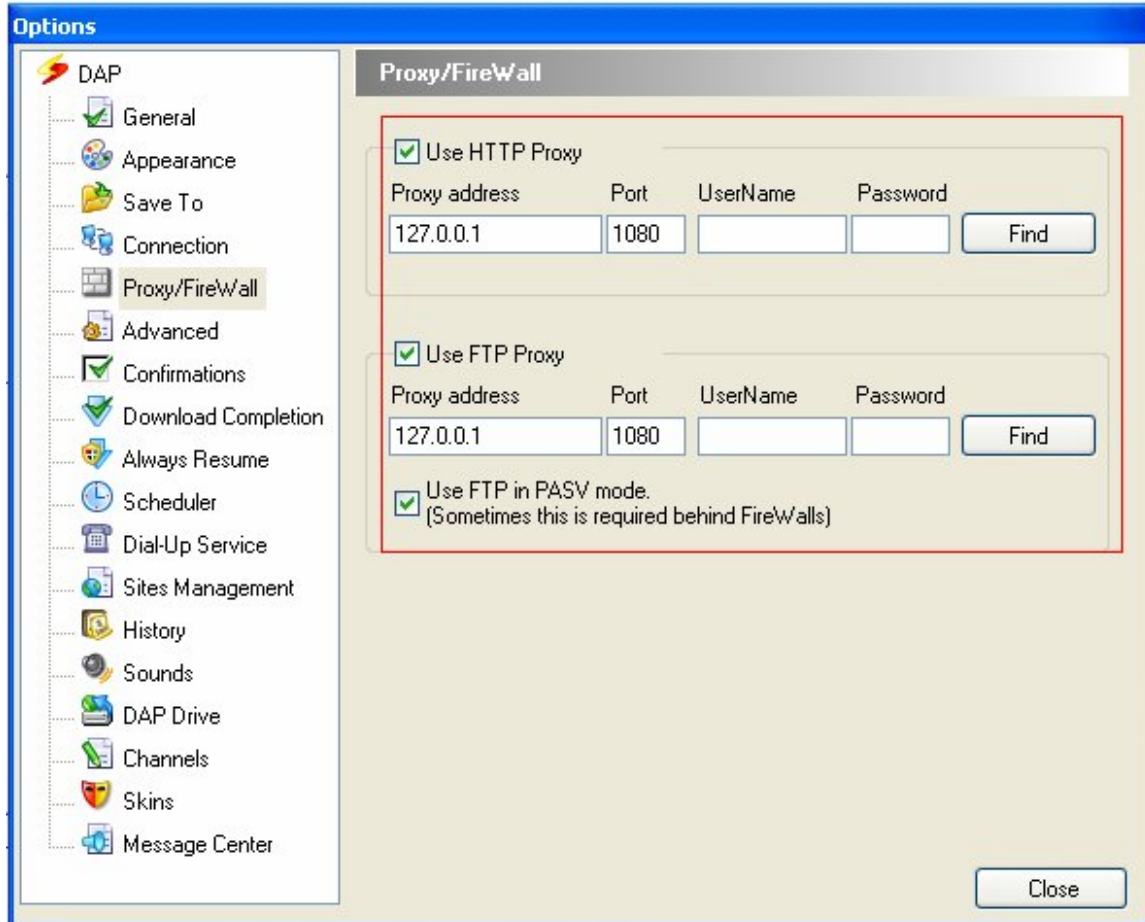

Extreme Acceleration Speed if you have the premium version of DAP Client

2.From the Left Hand Side choose Proxy/Firewall

Enable all the Proxy modes and enter 127.0.0.1 for Proxy Address and 1080 for Port

Enable “Use FTP in PASV mode”

Click on close and you are good to go

Here I am downloading one of the guides from HTTP Tunnel

The screenshot shows the Download Accelerator Plus (DAP) software window. The title bar reads "86% of Google Talk.pdf - Download Accelerator Plus". The main window title is "Download Accelerator Plus". Below the title bar, the file name "Google Talk.pdf" is displayed with a "Add Tags for this file" link. The URL is "http://www.http-tunnel.com/files/Google%20Talk.pdf". The save location is "C:\Documents and Settings\rac\My Documents\My Completed Downloads\Google T".

The download progress is shown as 86% complete. The time left is 4s, and the speed is 20.5 KB/s. A progress bar indicates 526.3 KB of 609.5 KB downloaded.

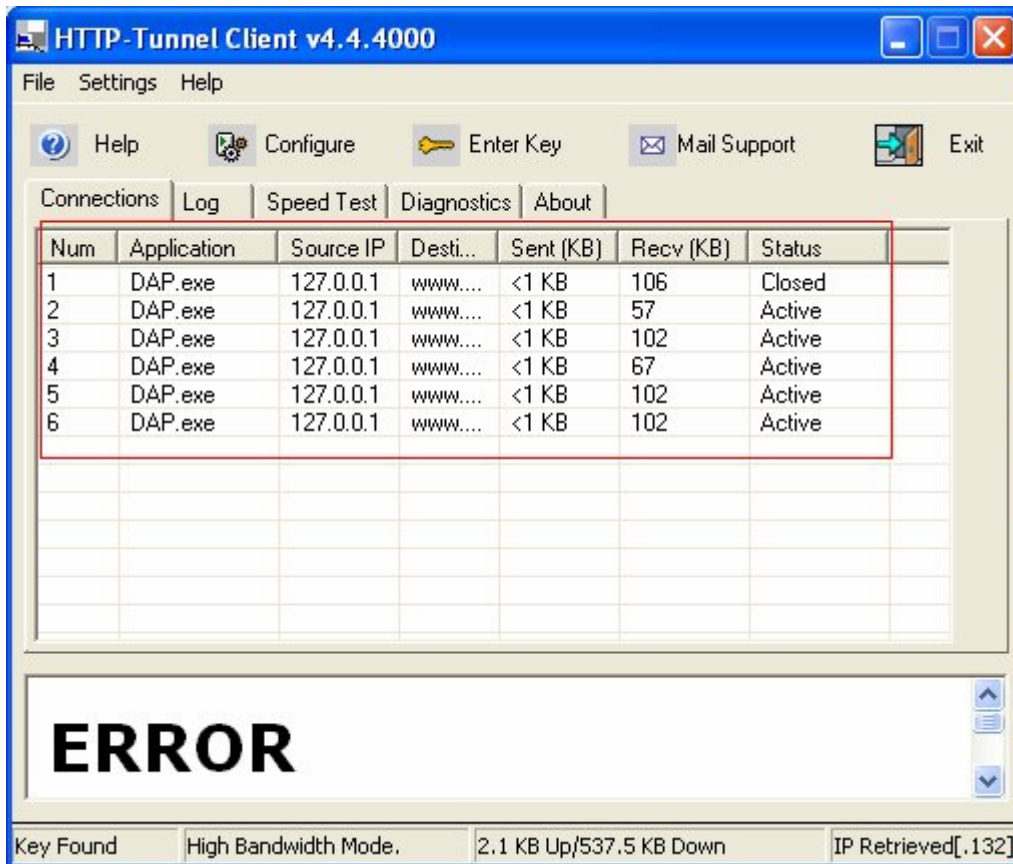

A "Downloading ..." window is open, showing a list of download segments:

Size	Progress	Server location
101.6 KB	Done	www.http-tunnel.com
54.5 KB	Progressing	www.http-tunnel.com
101.6 KB	Done	www.http-tunnel.com
65.4 KB	Progressing	www.http-tunnel.com
101.6 KB	Done	www.http-tunnel.com

Below the table, it says "Resume Supported". To the right, there is a "Top Games" section with "By DAP Users" and a list of games: Counter Strike, FIFA 2006 Demo, and F.E.A.R. Combat, each with a download icon.

A "Close" button is located at the bottom left of the DAP window.

At the bottom of the screenshot, there is a blue banner with the text: "Compare Download Accelerator Plus versions: DAP free vs. DAP Premium. Clicking this ad will not disrupt your download".

Small tip : Sometimes all the streams for download are not activated,in this case Stop and Resume the download but only if it says on the download window that “Resume Supported”
